Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 1 and 2 objected to because of the following informalities: The claims use phrases such as "such as," "for instance," "preferably," and "in particular." The Applicant is encouraged to use more precise language in claiming the invention. Appropriate correction is suggested, but not required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 5-190183.

Regarding claim 1, the reference teaches a solid oxide fuel cell ("SOFC") in the abstract. The abstract discloses a nickel-based electrode structure comprising added Mn. The abstract further discloses that the Mn is contained in a molar ratio of 1-15 mol% with respect to all the metallic elements on the surface of the electrode. This is considered to be anticipatory of the limitation that the added amount of Mn to the active zone of the electrode extending less than 20 microns from the electrolyte interface is within the range of 0.5 to 5 metal atom % (i.e., the mole% range

disclosed by the reference encompasses the claimed metal atom% range, and the disclosure of Mn atoms “on the surface” anticipates the claimed range of less than 20 microns from the surface; see MPEP §2131.03). Additionally, regarding claim 2, the abstract discloses that “in other cases, Mn is contained in a molar ratio of 5-50mol% for all the metallic elements in the fuel electrode.” This is considered to be anticipatory of the limitation that the added amount of Mn to the part of the electrode spaced more than 20 microns from the electrolyte interface is within the range of 0.5 to 10 metal atom %. Note: mole percent and metal atom percent are used interchangeably herein, since the reference identifies the mole percent as being with respect to “metallic elements.”

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jonathan Crepeau whose telephone number is (703) 305-0051. The examiner can normally be reached Monday-Friday from 9:30 AM - 6:00 PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski, can be reached at (703) 308-4333. The phone number for the organization where this application or proceeding is assigned is (703) 305-5900. Additionally, documents may be faxed to (703) 305-5408 or (703) 305-5433.
